CMPT 225 - D100 Data Structures and Programming

Instructor(s): Anne Lavergne

Calendar Objective/Description:
Introduction to a variety of practical and important data structures and methods for implementation and for experimental and analytical evaluation. Topics include: stacks, queues and lists; search trees; hash tables and algorithms; efficient sorting; object-oriented programming; time and space efficiency analysis; and experimental evaluation.

Instructor's Objectives:
The goal of this course is to introduce many of the fundamental algorithms and data structures of Computing Science in the context of abstract data types (ADTs). We'll use C++ to implement them, and O-notation to study their performance.

Prerequisites:
(MACM 101 and (CMPT 125 and 127), CMPT 129 or CMPT 135) or (ENSC 251 and ENSC 252). Quantitative

Topics:
- Object-oriented programming
- Abstract data types (ADTs)
- Data structures: lists, stacks, queues, trees, heaps, sets, hash tables, graphs, disk-bound data
- Algorithms: searching and sorting, and their efficiency

Grading:
Marks will be based on: classroom participation; programming assignments; lab activities; in-class written midterm exam; written final exam. The exact details of the marking scheme will be given in the first week of the course.

Students must attain an overall passing grade on the weighted average of exams in the course in order to obtain a clear pass (C- or better).

Required Books:

i-Clicker, 9781464120152, i-Clickers will be used regularly in class from the beginning of the semester. All versions of i-Clicker may be used. Each student needs to have his/her own i-Clicker.

Reference Books:
Programming, Principles and Practice Using C++ (2nd ed), Bjarne Stroustrup, Addison Wesley, 2014, 9780321992789, Available online. Also, any good C++ reference is okay.

Academic Honesty Statement:
Academic honesty plays a key role in our efforts to maintain a high standard of academic excellence and integrity. Students are advised that ALL acts of intellectual dishonesty will be handled in accordance with the SFU Academic Honesty and Student Conduct Policies (http://www.sfu.ca/policies/gazette/student.html).
