CMPT 165 - D100 Introduction to the Internet and the World Wide Web

Instructor(s): Ramesh Krishnamurti

Calendar Objective/Description:
We shall examine the structure of the Internet and the World Wide Web as well as design and create web sites. Students who have obtained credit for, or are currently enrolled in a CMPT course at the 200 division or higher, CMPT 125, 135 or 170, or IAT 265 or 267 may not take CMPT 165 for further credit. Breadth-Science

Instructor’s Objectives:
In this course, we introduce the Internet and the World Wide Web. More specifically, we examine the structure of the Internet and the World Wide Web and learn how they work. We also look at how web pages are created, then we design and create our own web sites. We will also explore the basics of design and programming. There are no prerequisites for this course; it does not assume any background in computer science. Students should have access to a computer with Internet access (any operating system is acceptable).

Also see the course curriculum description here: http://www.cs.sfu.ca/CC/curriculum/cmpt165.html

Prerequisites:
None

Topics:
- The World Wide Web
- Markup and XHTML
- Cascading Style Sheets
- Graphics and Images
- Design
- Forms and Programming

Grading:
To be discussed the first week of classes
Students must attain an overall passing grade on the weighted average of exams in the course in order to obtain a clear pass (C- or better).
