CMPT 741 - G100 Data Mining

Instructor(s): Ke Wang

Calendar Objective/Description:
The student will learn basic concepts and techniques of data mining. Unlike data management required in traditional database applications, data analysis aims to extract useful patterns, trends and knowledge from raw data for decision support. Such information are implicit in the data and must be mined to be useful.

Instructor’s Objectives:
Data mining aims to extract useful patterns, trends and previously unknown knowledge from raw data for decision support. This course has two focuses: basic concepts and techniques, and recent technologies and developments in dealing with very large data sets. For the first focus, we will study the classic data mining techniques including association, classification, and clustering; for the second focus, we will study the dominant software systems and algorithms for coping with Big Data. Topics include large-scale non-traditional data storage frameworks including graph, recommendation algorithms; and data security. The course will involve hands-on programming assignments and projects.

Prerequisites:
None

Topics:
- 1. Introduction
- 2. Association Rule Mining
- 3. Classification and Supervised Learning
- 4. Clustering and Unsupervised Learning
- 7. Finding Similar Items
- 9. Link Analysis
- 10. Recommendation Systems
- 11. Dimensionality Reduction
- 12. Data Security

Grading:
Assignments/Projects (40%), Midterm (20%), and Final exam (40%)

Required Books:
Introduction to Data Mining, Pang-Ning Tan, Addison Wesley, 2006, 9780321321367, Available online
Lecture notes: a combination of the notes provided by the authors in item 1, the slides of the course “CS345A: data mining” at Stanford University, and the slides of the instructor.
Data Mining: Concepts and Techniques, 3rd Edition, Han, Kamber, Pei, Morgan Kaufmann, 22 Jun 2011, 9780123814791, Available online
Academic Honesty Statement:

Academic honesty plays a key role in our efforts to maintain a high standard of academic excellence and integrity. Students are advised that ALL acts of intellectual dishonesty will be handled in accordance with the SFU Academic Honesty and Student Conduct Policies (http://www.sfu.ca/policies/gazette/student.html).
