CMPT 165 - D100 Intro Internet World Wide Web

Instructor(s): Anne Lavergne

Calendar Objective/Description:
Intro Internet World Wide Web

Instructor's Objectives:
In this course, we introduce the Internet and the World Wide Web. More specifically, we examine the structure of the Internet and the World Wide Web and learn how they work. We look at how web pages are created, then we design and create our own web sites. We will also explore the basics of web design and web programming. There are no prerequisites for this course; it does not assume any background in computer science. Students should have access to a computer with Internet access (any operating system is acceptable).

**This semester, this course is offered online via the Internet. Therefore, students will need access to a computer, the Internet and a browser application. Other computer-related requirements will be discussed during the semester.

Prerequisites:
see go.sfu.ca

Topics:
- The Internet and the World Wide Web
- Markup and HTML
- Presentation and Cascading Style Sheets (CSS)
- Graphical Images
- Web Design
- Web Programming using JavaScript

Grading:
This course will have the following activities: midterm(s), final exam, assignments and maybe more. These activities and their associated dates will be discussed during our first lecture.

Students must attain an overall passing grade on the weighted average of exams in the course in order to obtain a clear pass (C- or better).
