CMPT 371 - D100 Data Communications/Networking

Instructor(s): Ouldooz Baghban Karimi

Calendar Objective/Description:
Data Communications/Networking

Instructor's Objectives:
Communication networks play a central role in our everyday connected life. This course is an introduction to the basic concepts, principles, and technologies for understanding communication networks. The course will cover the preliminaries of networks and the Internet, and will provide students the foundation to further study networks.

Students must have access to a computer with stable internet connection. Some components of the course require real-time participation during the scheduled lecture and/or exam times.

Prerequisites:
see go.sfu.ca

Topics:
- Introduction to Networks: Basic Principles, Architecture, and Reference Models
- Application Layer: Principles, HTTP, MAIL, DNS, P2P, Multimedia, CDN
- Transport Layer: Reliable Transport, Connection, Congestion, TCP & UDP
- Network Layer: Data Plane, Control Plane, IP, Forwarding, Routing, SDN
- Data Link Layer: Concepts, Media Access, LANs
- Advanced Topics

Grading:
Assignments & Mini Project (30%) Quizzes & Interactive Sessions (15%) Midterm (20%) Final (35%)

Students must attain an overall passing grade on the weighted average of exams in the course in order to obtain a clear pass (C- or better).
